## SENSATIONAL TEMPERATURE MONITORING RESULTS

Since our last bulletin DAN has received unprecedented inquiry from organisations wanting to monitor temperature in refrigerated and frozen food storage areas. Even after as little as one month following installation the savings being achieved by several customers have been absolutely sensational.

GPRS + SATELLITE

A DATA LOGGER

FOR EVERY APPLICATION

## FREE MONITORING TRIALS

Under certain circumstances DAN is prepared to provide a FREE MONITORING TRIAL for a period of 3 months. So confident are we about the superiority, reliability and general performance of our product we will provide equipment for you to install and after 3 months you can buy it at the price you agree at the outset or you can tell us to come and take it away. BE WARNED however that most people who embark on a free trial very rapidly find they cannot do without the data delivered to their desk! We hope to hear from you soon.

## SERVICE PROVISION

As an alternative to offering 'capital purchase' of DAN equipment, Data Acquisition Networks is now offering 'Provision of Service Agreements'. All this simply means is that you pay a monthly fee for a 36-month period for your required data to be collected and made available for you on the website. For you there are no set-up costs, no capital requisitions, just the data you want, delivered to your desk within days of you making the inquiry. DAN is always seeking ways to make life easier for customers. If you have interest in a 'Provision of Service Agreement' please ask your DAN representative for more information.
