## REFRIGERATED TRANSPORT MONITORING

Food manufacturers have always been aware storage **temperature has a huge impact on the shelf life, the eating quality and the safety of the product they sell.** The DAN DM09 is 'road tested' and able to meet the demands of monitoring temperature and other critical data on long haul and short haul vehicles. The DAN DM09 provides data records that cannot be tampered with PLUS alarms when things go wrong.

## AREN'T ALL DATA LOGGERS THE SAME?

When comparing data loggers from different suppliers it is very important to understand the features of each. DAN data loggers provide a number of **BUSINESS CRITICAL FEATURES** that will not be found in cheaper alternatives. DAN data loggers provide a **secure data vault, instantaneous data** PLUS the **capacity for 'derived' data**. DAN is securing an increasing number of customers that have a data logger but are not getting the functionality they need. Ask DAN for a short demonstration of the unique benefits of **data logging the DAN WAY!**

## ANOTHER MOBILE APPLICATION!

Movement of dangerous or volatile effluents from site to a location for disposal has long since represented a threat to the environment consistent with the diligence of the driver in following procedures. New designs in on-board systems make it easier for the driver to comply with regulations. Approvals for these designs are subject to compliance with monitoring the truck's operation. **DAN to the rescue.** Remote monitoring provided by DAN permits the disposal service operator to monitor the truck 24/7, live on-line. Alarms notify base immediately should the driver not follow procedures when collecting/depositing loads, or when in transit.
