

**Data Acquisition Networks Pty Ltd**

More & more people everyday  
are realising the benefits of  
monitoring what they do

# DAN BRIEF

November 2009

## DE20 LAUNCHED

Data Acquisition Networks has completed development of the DE20 a product that will **revolutionise manual data collection and eliminate paper records** for organisations with **limited or remote supervisory staff**. Data collected manually can be input by an operator through a user-friendly menu. The DE20 transmits that data along with automatically collected data to the website where it can be viewed by those with password access and where it becomes a permanent record. The DE20 takes the process of manual data collection and storage to a new and exciting level of simplicity and sophistication.

### DATA DELIVERED TO YOUR DESK

**DAN provides customers with real time information necessary to monitor critical operations.**

**The DAN website allows multiple users to view, graph, report and download data from remote locations instantly and reliably.**

### LOCAL CONTROL

The 'local control' facility standard on many DAN products has until now been largely under-utilised. The **LOCAL CONTROL** facility is able to recognise an approaching alarm condition and take a 'local' action such as turning on a dosing-pump, diverting a flow of liquid into a holding tank or simply switching equipment on or off as required. The **LOCAL CONTROL** feature when combined with the ease of adding new sites for monitoring makes DAN ideal for small-scale or geographically spread SCADA solutions. Talk to Data Acquisition Networks about how we can save you time and money through the installation of a monitoring unit with **LOCAL CONTROL**.

### EXPORT

DAN is very proud of its **Australian heritage** and of the fact DAN product has been **developed & designed in Australia and is manufactured in Australia**. This means DAN is responsive to 'local' customers in a way our competitors simply cannot match. 2009 has seen strong growth in export sales into a variety of markets and a variety of applications. DAN is succeeding in export markets because we offer reliable and functional product and because our team of engineers are able to design custom-built solutions that work!

#### SWIMMING POOL MONITORING

The number of commercial swimming pool owners and operators wishing to monitor pH, Cl/ORP, TDS & temperature continues to grow.

### TO AUTOMATE YOUR DATA COLLECTION CALL DAN TODAY.

#### FOOD SAFETY MONITORING

DAN is experiencing unprecedented enquiry from organisations providing food to the public that wish to automate the collection of their HACCP records and receive instant alarms when things go wrong!
