

Powerful Web Based Data Logging Solutions

# The DAN Website Security

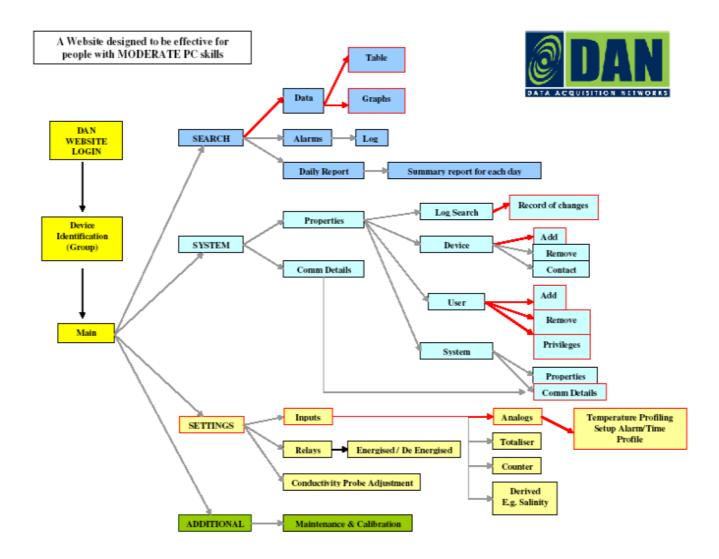

&

# Administration Instructions

## **INDEX**

TOPIC	PAGE
Login	 3
Properties	 4
Log Search	 6
Add Device (To a Group)	 7
Remove a Device	 8
Contact	 9
Notes on Users & Privileges	 10
Add User	 11
Remove User	 12
Privileges	 13

The flow chart below will assist in locating where to find various elements of the web site:

## **LOGIN**

Refer 'DAN - ACCESSING YOUR SYSTEM'

Once you have successfully logged onto your system on the DAN website, the index can be found across the top of the page, below the blue banner. A detailed explanation of each index item is provided below. To return to the 'main' index place your cursor over the word 'main' and select 'Index'

#### **IMPORTANT NOTES:**

- 1. Access to the Administration menu is limited to the users given that authority connected to their user ID and Password.
- 2. These notes cover the security and administration aspects of the DAN web site. For operational and maintenance instructions refer to the 'Set Up, Operational & Maintenance Instructions'
- 3. When **ANY** change is made to a page it is necessary to scroll to the bottom of the page and **submit** the change. Once accepted by the DAN server you will be required to **click OK** to confirm the change.
- 4. SMS Messages will only be sent if the facility has been activated (refer communication setup).
- 5. Any shaded field cannot be changed.

#### **PROPERTIES**

The Properties page is found by passing your cursor over the 'System' item and clicking on the drop down 'Properties'. The following page will be displayed.

DATA ACQUISITION NETWORKS	600	Data	Based Logging	Solutions	
Main	Log Search	Device	User	System	Logout
	System	Properties

NOTE: All shaded fields on this page must be entered through the Administrator's access under "Device'

GROUP ALIAS: The name given to this unit and if other units are added will be the name of the

group of units

**SERIAL NUMBER:** The serial number of the hardware given to the assembly by DAN. This number

should be the same as the number on the hardware. The serial number on the hardware may be found on the edge of the lower board nearest the hinge (toward

bottom of unit)

**OTHER DETAIL:** This is a record of part numbers used in the production of the unit

**TELEPHONE:** The contact number provided for contacting the hardware via mobile telephone **CURRENT GMT IN**This is the reporting format of the time with respect to GMT currently being used in

**USE:** this u

**NEW GMT TO BE** If required to be changed, in put the new reference to GMT in this window.

USED:

AFTER: Enter the date and time in the required format at which the GMT reference is to

change from the current to the new GMT. It is important to note that this time must

be later than the current local time displayed below

**CURRENT LOCAL** 

**SYSTEM FIRST** 

TIME

Given the current GMT in use, this is the time and date the system is using to report

The date the hardware was first turned on and the date from which any free period **ACTIVATED:** included with the unit will be timed.

**PARAMETERS LAST** 

The last date on which any operating or security setting was changed

The ID of the user who is nominated as the contact (for contact by DAN)

**CHANGED:** 

The name of the nominated user NAME: The address of the nominated user ADDRESS:

TEL (DAY): The nominated user's daytime telephone number **TEL (AFTER** The nominated user's after hours telephone number

HOURS):

**USER ID:** 

#### **LOG SEARCH**

The Log Search page is found by clicking on the menu item. The following page will be displayed:

The Log Search provides a report over the period selected and includes details of all changes made to the system parameters, when the change was made and the logon ID of the person who made the change.

**SEARCH CONDITION** (Automatically defaults to the last two days)

**FROM:** The date and time from which the search should commence TO: The date and time from which the search should end

**RESULT SET ORDER** 

**DATE/TIME:** By drop down select if the most recent date to be at the top or bottom of the report.

**USER ID:** The ID of the user who is nominated as the contact (for contact by DAN)

**SEARCH** Click search to produce the report

# ADD DEVICE (To a Group)

The Add Device page is found by passing your cursor over the 'Device' item and clicking on the drop down 'Add Device'. The following page will be displayed:

The add device function adds second and subsequent devices to the Group permitting logon to multiple field units via one logon ID and password. The facility to move between filed units is also facilitated without the need to logout and then log back in. Security access remains defined by field unit.

# ADD NEW DEVICE

**SERIAL NUMBER:** 

Insert the serial number of the unit to be added to the Group. This number should be the same as the number on the hardware. The serial number on the hardware may be found on the edge of the lower board nearest the hinge (toward bottom of unit)

## **APPLICABLE GROUP:**

**Group:** The Group to which this new field device will be added

## **DEVICE SECURITY**

**User ID:** The user ID issued by DAN when the unit was first purchased **Password:** The password issued by DAN when the unit was first purchased

# REMOVE DEVICE (From a Group)

The Remove Device page is found by passing your cursor over the 'Device' item and clicking on the drop down 'Remove Device'. The following page will be displayed:

The Remove Device function allows a field device to again operate as a stand alone unit.

DATA ACQUISITION NETWORKS	owerful Web Data	Based a Logging	Solutions	
Main Log 9	Search Device	User	System	Logout
ADMINISTRATIVE	TASK OF REMOVING SE	ERIAL NUMBER FR	OM THE GROUP	
	Remove Device			
REMOVE DEVICE				
SERIAL NU	MBER:	[YYMMXXXX]		
APPLICABLE GROUP				
	<b>Group</b> : 04050006			
DEVICE SECURITY				
ι	Jser ID:	]		
Pas	sword:			
	Submi	t		

# **REMOVE DEVICE**

**SERIAL NUMBER:** 

Insert the serial number of the hardware to be removed from the Group. This number should be the same as the number on the hardware. The serial number on the hardware may be found on the edge of the lower board nearest the hinge (toward bottom of unit)

#### **APPLICABLE GROUP**

**GROUP:** 

The Group from which this field device will be removed

### **DEVICE SECURITY**

User ID: Password: The user ID issued by DAN when the unit was first purchased The password issued by DAN when the unit was first purchased

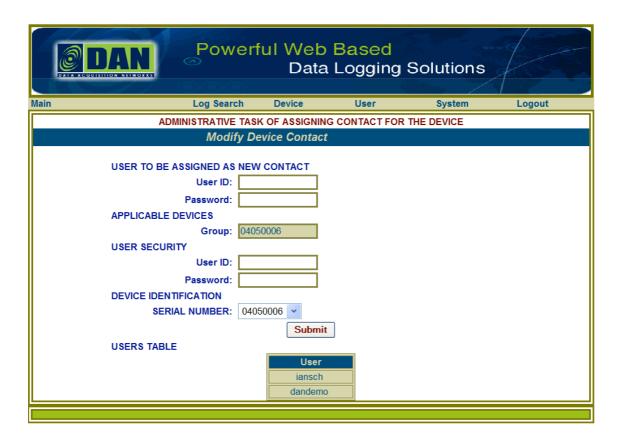

**SUBMIT** 

Do not forget to submit changes

#### CONTACT

The Contact page is found by passing your cursor over the 'Device' item and clicking on the drop down 'Contact'. The following page will be displayed:

The Contact function nominates one user as the contact for DAN and facilitates DAN's making contact to relay important information regarding the system. This user's details are copied to the properties page.

#### **USER TO BE ASSIGNED AS NEW CONTACT**

**User ID:** The user ID of the person nominated as the contact for DAN **Password:** The password of the person nominated as the contact for DAN

#### **APPLICABLE DEVICES**

**Group:** The Group number in which the field device to have it's contact registered resides.

# **USER SECURITY**

**User ID:** The user ID issued by DAN when the unit was first purchased **Password:** The password issued by DAN when the unit was first purchased

#### **DEVICE IDENTIFICATION**

**SERIAL NUMBER:** By dropdown, identify the serial number for which this user is to be the contact.

This number should be the same as the number on the hardware. The serial number on the hardware may be found on the edge of the lower board nearest the

hinge (toward bottom of unit)

**USERS TABLE** (A table containing all users for this group)

#### **NOTES ON USERS AND PRIVILEGES**

The security system allows for access to be assigned by user ID and Password. Each user ID and Password combination must be unique within the DAN system. This protocol permits users to be given access to multiple groups using the same details. For example, an authority representative may be given access to a number of units to view particular data by using the same password and ID. Prior to setting up access for a new user, confirmation should be obtained that they do not already have a password and ID. If they do, access to them can be granted under their existing details.

#### **ADDING A USER**

Assigning privileges to a new user can be achieved by two methods:

- 1. the simple method is to click one of the standard privileges and those access rights will be assigned for the field device or across the whole Group if there is more than one unit in the Group.
- 2. For individualised access by field unit within a Group, the user must be set up for each field unit separately on the 'Privileges' page.

The DAN system does not limit the number of users nor the number of administrators assigned. The security system is totally under the control of the administrator(s).

#### **MODIFICATIONS TO USERS & PRIVILEGES**

To change a user's password or ID, the existing detail must be removed first (refer Remove User). The user must then be input as a new user with privileges being also re-input.

Modifying a user's privileges is achieved by using the Privileges page (refer below). Any input on this page against a user will overwrite any other previous input. Privileges cannot therefore be simply added, with the whole page being redrafted including the changes.

The User Privileges Table found at the bottom of the Privileges page provides a quick reference as to the users granted access to the system and their respective privileges.

#### **ADD USER**

The Add User page is found by passing your cursor over the 'User' item and clicking on the drop down 'Add User'. The following page will be displayed:

ADMINISTRATIVE TASK OF ADDING NEW USER  ADD NEW USER  USER ID: PASSWORD: MAX INACTIVE INTERVAL: E MAIL: ADDRESS: TEL (DAY):  Administrator (User and Device Accounts, Group Alias)  PRIVILEGES: Standard (View Device Setting)  Restricted (Initially no privileges, Go to menu User Privileges to set it up)  APPLICABLE DEVICES  Group: 040550006  USER SECURITY User ID: Password: SUbmit	DATA ASSOCIATION NITHOUSES			b <mark>Based</mark> a Logging S	olutions

**ADD NEW USER** 

**USER ID:** The ID assigned to the new user **PASSWORD:** The password assigned to the new user

MAX INACTIVE The time in minutes of inactivity before this user's session is terminated by the

INTERVAL: Server

**FULL NAME:** The name of this user

**E MAIL:** The email address of this user ADDRESS: The address of the nominated user

**TEL (DAY):** The nominated user's daytime telephone number TEL (AFTER HOURS): The nominated user's after hours telephone number

**PRIVILEGES** (Explained)

Administrator Click to give administrator privileges across the Group to this user

Power Click to give this user access to all data and ability to change set points for

alarm/control points, calibration data, relay settings etc. across the Group

Standard Click to give this user the ability to view all data and set points, calibration data,

relay settings etc. across the Group

Restricted If this cell is clicked, privileges must be assigned via the User Privileges menu (see

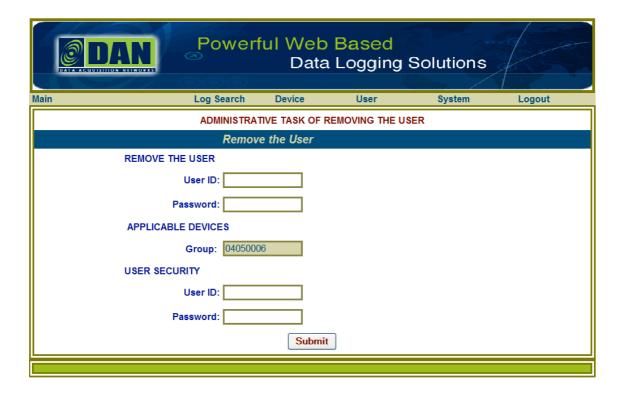

below) and tailored for each device in the Group individually

**USER SECURITY** 

**User ID:** The User ID of the Administrator making this addition **Password:** The Password of the Administrator making this addition

#### **REMOVE USER**

The Properties page is found by passing your cursor over the 'System' item and clicking on the drop down 'Properties'. The following page will be displayed

#### **REMOVE THE USER**

**User ID:** The ID of the user to be removed

**Password:** The password of the user to be removed

**APPLICABLE DEVICES** (Removal of a user removes all access to a Group)

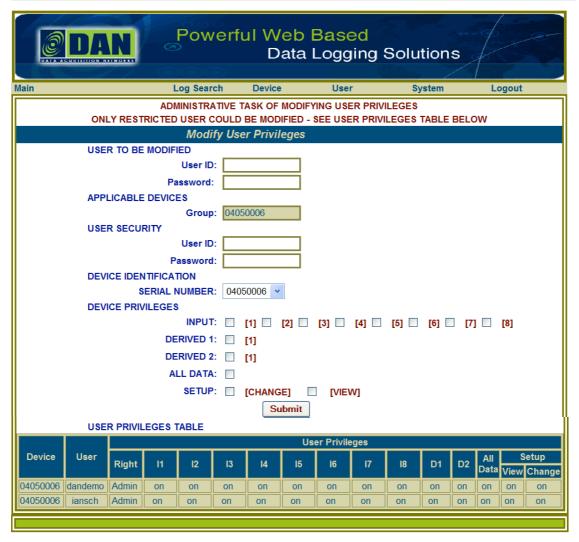

**Group:** The Group from which the user is being denied access

**USER SECURITY** 

**User ID:** The User ID of the Administrator making this addition **Password:** The Password of the Administrator making this addition

#### **PRIVILEGES**

The Privileges page is found by passing your cursor over the 'User' item and clicking on the drop down 'Privileges'. The following page will be displayed:

#### **USER TO BE MODIFIED**

**User ID:** The ID of the user to have privileges modified

**Password:** The password of the user to have privileges modified

#### **APPLICABLE DEVICES**

**Group:** The Group within which this user is to have privileges modified

#### **USER SECURITY**

**User ID:** The User ID of the Administrator making this change **Password:** The Password of the Administrator making this addition

#### **DEVICE IDENTIFICATION**

**SERIAL NUMBER:** By dropdown select the field device to which this modification will apply

## **DEVICE PRIVILEGES**

INPUT: Click inputs data that may be accessed

DERIVED 1: Click if access to derived 1 data is allowed

DERIVED 2: Click if access to derived 2 data is allowed

ALL DATA: Click if all data may be viewed

**SETUP:** Click to nominate access to change or view set up data
