

The DAN Website

Set Up

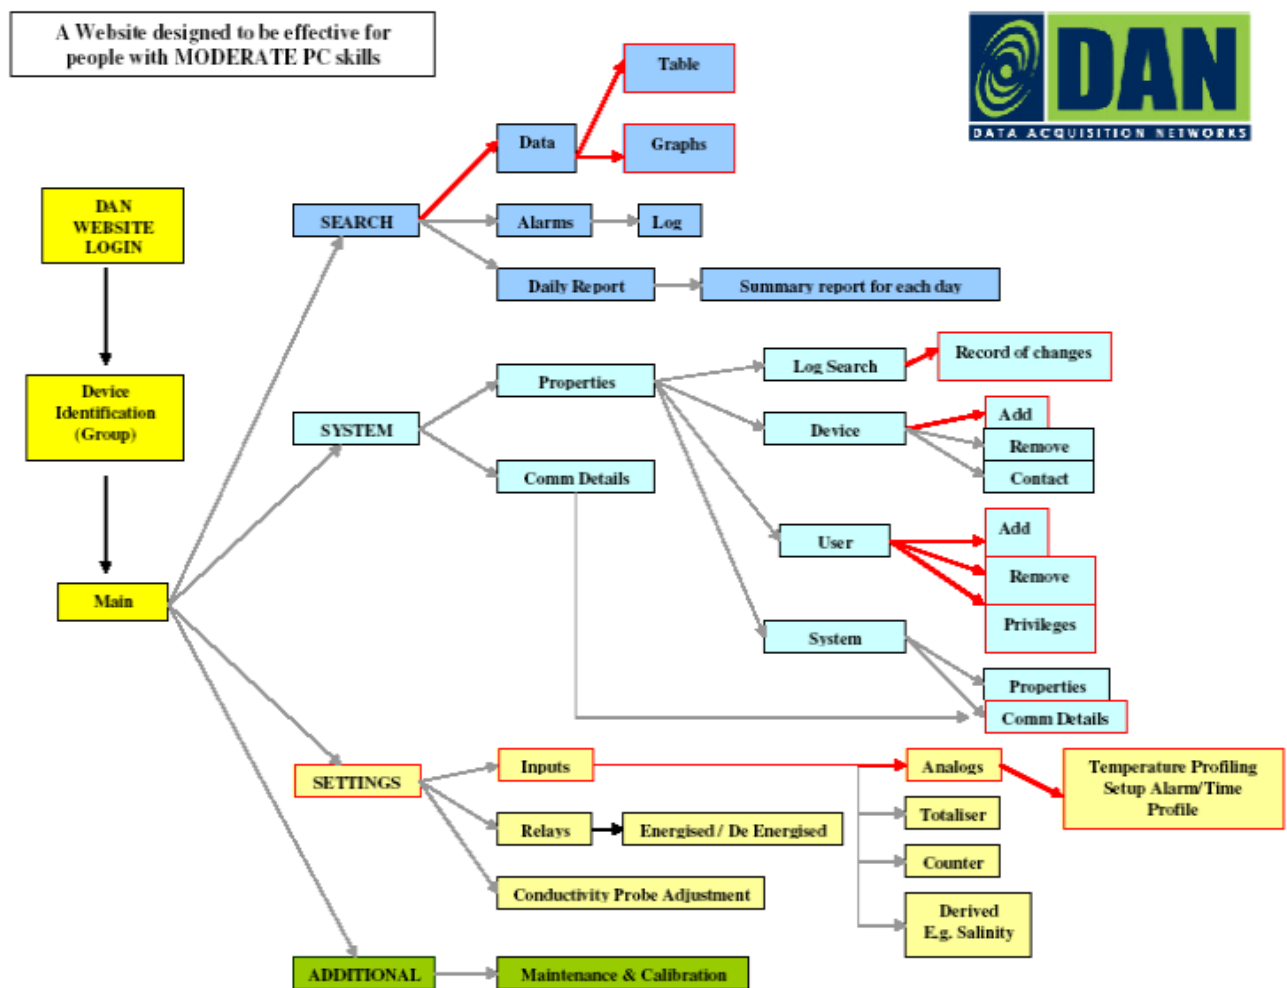

'HD' Type

Wireless Water Metering

INDEX

TOPIC	PAGE
Login	3
Settings – Input Setup	4

The flow chart below will assist in locating where to find various elements of the web site:

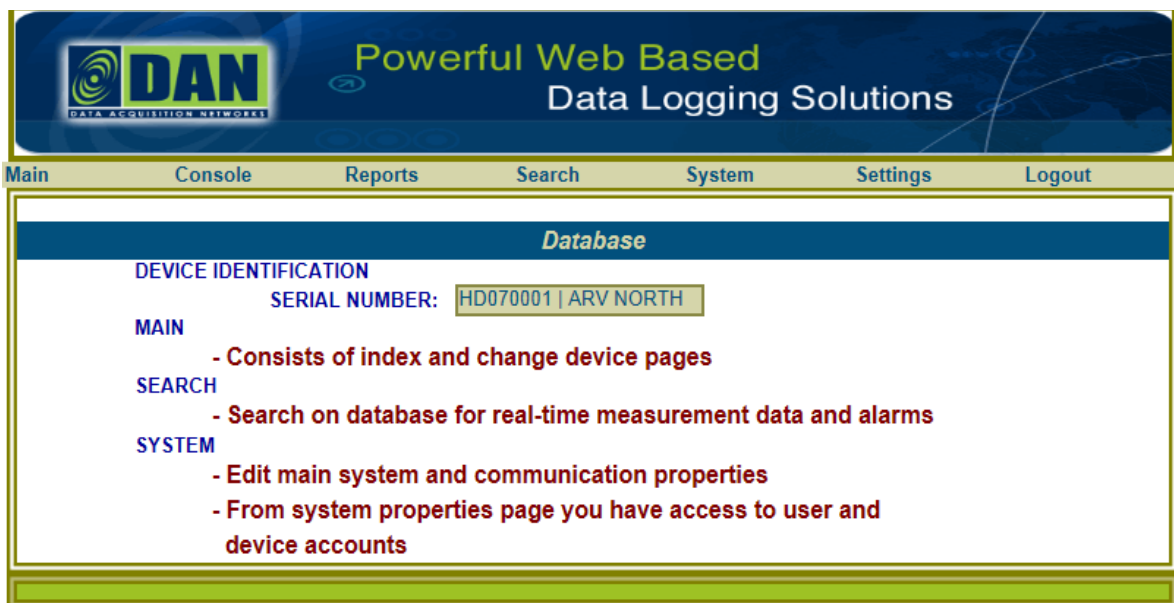

LOGIN

Once you have successfully logged onto your system on the DAN website, the index can be found across the top of the page, below the blue banner. A detailed explanation of each index item is provided below. To return to the 'main' index place your cursor over the word 'main' and select 'Index'

IMPORTANT NOTES:

1. These notes cover the operational aspects of the DAN web site. For security set up and maintenance refer to the 'Administrator's Instructions'
2. When **ANY** change is made to a page it is necessary to scroll to the bottom of the page and **submit** the change. Once accepted by the DAN server you will be required to **click OK** to confirm the change.
3. SMS Messages will only be sent if the facility has been activated (refer – communication setup).
4. Any shaded field cannot be changed.
5. The maximum allowable number of characters that may be entered into any SMS message window is 98.
6. Search procedures are detailed for standard search facilities (Data and Alarm). Other search procedures follow the same pattern and may change from time to time.

The screenshot displays the DAN web interface. At the top is a blue banner with the DAN logo (Data Acquisition Network) and the text "Powerful Web Based Data Logging Solutions". Below the banner is a navigation bar with links: Main, Console, Reports, Search, System, Settings, and Logout. The main content area is titled "Database" and contains the following sections:

- DEVICE IDENTIFICATION**
 - SERIAL NUMBER: HD070001 | ARV NORTH
- MAIN**
 - Consists of index and change device pages
- SEARCH**
 - Search on database for real-time measurement data and alarms
- SYSTEM**
 - Edit main system and communication properties
 - From system properties page you have access to user and device accounts

SETTINGS (Setting up Inputs)

The input set up page is found by passing your cursor over the 'Settings' item and clicking on one of the drop down groups 'Inputs 1 to 6' and so on. The following page will be displayed related to the input group selected.

Submit

INPUT SET UP

IN USE Tick each input in use
INPUT TYPE For the water meter application, this input is pre-set to volume
INPUT NAME To assist with identifying this input throughout the system, provide a recognizable name for this input

MISSING REPORTS DETECTION: Should you require the web site to monitor your field unit for missed reports

METER DETAILS
CUSTOMER Pre-set
METER NOs Pre-Set
METER IDs Pre-set

MEASURED VARIABLE UNIT Pre-set

ALARM/CONTROL A
TIME START/END TYPE Select the elapsed times between which this alarm is to be measured
Select for this alarm point to be 'HIGH' or 'LOW'
SET POINT Input the level at which the daily use of water is to be recognized as an alarm.
DEAD BAND Pre Set
DELAY TIME (SECOND) Pre-Set

WHEN ALARM TRIPS:
SEND EMAIL: Tick if an email is to be sent when the alarm/control is recognised
SEND SMS: Tick if an SMS is to be sent when the alarm/control is recognised
KEEP SERVER UPDATED Tick to keep the server updated only (Must be ticked first before email or SMS notifications may be activated)
TRIP MESSAGE: Script the SMS message to be sent on alarm/control recognition
WHEN ALARM RESETS:
SEND EMAIL: Tick if an email is to be sent when the alarm/control is recognised
SEND SMS: Tick if an SMS is to be sent when the alarm/control is recognised
KEEP SERVER UPDATED Tick to keep the server updated (Must be ticked first before email or SMS notifications may be activated)
RESET MESSAGE: Script the SMS message to be sent on alarm/control reset

ALARM/CONTROL B
Similarly input all entries for Alarm/Control point B (if required).
NOTE: Either or both alarm/control points may be 'HIGH' or 'LOW'

SUBMIT Do not forget to submit changes

REPEAT THIS SETUP FOR EACH SET OF INPUTS THAT ARE ACTIVE
